

SuperFleet: The Last Mile, Perfected

Transforming last-mile delivery with elite rider-employees and intelligent algorithms to ensure perfect order fulfillment every time.

The Problem

Your Customer's Perfect Order is Killed by the Last Mile

45%

Complaints

Nearly half of all customer complaints are delivery-related

Attrition

High customer attrition due to poor delivery experiences

Our Solution

Fully managed, elite rider-employees via API

API Integration

Simple integration with your existing platform

Smart Algorithm

Multi-parameter allocation system

Happy Outcomes

Satisfied riders and delighted customers

How It Works

Step 1: Platform Integration

Your platform pings our API with delivery details

Step 2: Intelligent Assignment

Our algorithm assigns the best rider based on multiple parameters

Step 3: Completion & Logging

Job completion with comprehensive data logging for continuous improvement

Market Opportunity

\$ 6Bn+

Last-Mile Market

We're targeting the most painful segment: Quick Commerce

Businesses are willing to pay premium for reliability and customer satisfaction

Business Model

Subscription + Transactional Recurring Revenue

Base Subscription

Monthly fee for platform access and rider allocation

Per-Delivery Fee

Transactional component based on delivery volume

Premium Services

Additional fees for priority, special handling, and custom requirements

Market Validation
